

INDICATION: C2 fracture.

COMPARISONS: ____.

FINDINGS: Two lateral views of the cervical spine were obtained. There is some straightening of the normal cervical lordosis. A step-off at the anterior cortex of the C2 vertebral body is again seen. Disc space narrowing at C5-C6 and C6-C7 and small anterior osteophytes are similar since _____. Bilateral carotid bulb calcifications are unchanged. The visualized lung apices are clear.

IMPRESSION: Unchanged appearance of nondisplaced C2 fracture.
